

## CATERPILLAR 16M MOTOR GRADER | MG012

### PRODUCT SUMMARY

Motor Graders play a vital role in fleet management by helping minimize downtime of machines, typically associated with frequent maintenance needed due to bad site terrain and access roads.

Specially configured for mine operation and haul road development and maintenance, the Cat® 16 (16M3) maximizes availability and controls operating costs. Fuel efficient technologies and legendary Cat robust design and construction ensure these machines help your operation optimize profits.
