

JEC TH10,000 TYRE HANDLER

PRODUCT SUMMARY

The Austin Dual-Arm JEC Tyre Handler range has been engineered to provide cost-effective tyre handling solutions across the entire tyre and rim spectrum. The Dual-Arm Tyre Handler provides a safer, more efficient way to perform tyre maintenance on earthmoving equipment on location.

They incorporate standard features such as body and pad rotation, combined with the availability of side shift and quick hitch for convenience. They also have the ability to add on accessories such as crane jibs and fork frames.
